

FLU AND COVID

KNOW THE DIFFERENCES

Flu season is back and when you add COVID-19 to the mix, it can be hard to tell the difference between the two. Both are contagious respiratory illnesses, but different viruses. It's important to understand the differences and treatment options, as well as learn ways you can protect yourself during the cold and flu season to stay healthy.

Join us September 17 at 10 a.m. CT, as an expert medical epidemiologist on the frontlines of the COVID-19 response, and Marsha Hyslop, 2nd.MD Chief Clinical Officer, discuss the key differences between the flu and COVID-19 and the best ways to protect yourself from both.
